

# MEET RYAN

“We were so grateful to receive equipment for our 11-month-old son through CATS. The activity chair has given him a supportive place to sit so that he can be off the floor and with the rest of our family during mealtimes. It has also made it easier for him to safely eat solid food since it helps his head and neck remain upright.

While we haven't had the opportunity to use the stroller much yet given the cold weather we've been having, we're looking forward to taking him on many walks once the days are warmer. Thanks so much for providing our family with this equipment!”

- Katie Hirt (Ryan's Mom)
